Subject Index

Volume 16 July–December 1990

A

Abstracts
Abstracts of the Council for High Blood Pressure Research 44th Annual Fall Conference and Scientific Sessions, 313

Acetylcholine
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170
Role of Endothelium in the Response to Endothelin in Hypertension, 677

Acid-base equilibrium
Salt Sensitivity in Humans Is Associated With Abnormal Acid-Base Regulation, 407

Acidosis
Salt Sensitivity in Humans Is Associated With Abnormal Acid-Base Regulation, 407

Acute hypertension
Cardiac Afferents Attenuate Renal Sympathetic Baroreceptor Reflexes During Acute Hypertension, 131

Adipose tissue
Close Correlation of Intra-abdominal Fat Accumulation to Hypertension in Obese Women, 484

Adrenal glands
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635

Adrenal medulla
Exaggerated Response to Alerting Stimuli in Spontaneously Hypertensive Rats, 290

Adrenarche
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462

Adrenergic receptors
Upregulation of Renal α_2-Adrenergic Receptors Is Not Indicative of Salt-Related Increases in Blood Pressure in Spontaneously Hypertensive Rats, 49

Adrenocorticotropic hormone
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635

Aged
Effect of Age on the Efficacy of Blood Pressure Treatment Strategies, 700
Silent Cerebrovascular Disease in the Elderly: Correlation with Ambulatory Pressure, 692

Aging
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170
Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Neuropeptide Y in Rat Sympathetic Neurons Is Altered By Genetic Hypertension and By Age, 63

Albuminuria
Enalapril and Renal Injury in Spontaneously Hypertensive Rats, 544

Alcohol
Exercise Tolerance and Alcohol Intake: Blood Pressure Relation, 501
Two-Way Factorial Study of Alcohol and Salt Restriction in Treated Hypertensive Men, 398

Aldosterone
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Glucocorticoids and Atrial Natriuretic Factor Receptors on Vascular Smooth Muscle, 581

Ambulatory blood pressure monitoring
Early 24-Hour Blood Pressure Elevation in Normotensive Subjects With Parental Hypertension, 491
Physiological, Psychological, and Behavioral Factors and White Coat Hypertension, 140
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414
Silent Cerebrovascular Disease in the Elderly: Correlation with Ambulatory Pressure, 692

Androgens
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462

Angiotensin converting enzyme inhibitors
Brief Angiotensin Converting Enzyme Inhibitor Treatment in Young Spontaneously Hypertensive Rats Reduces Blood Pressure Long-term, 603
Comparison of Converting Enzyme Inhibitor and Calcium Channel Blocker in Hypertensive Glomerular Injury, 452
Concentration–Effect Analysis of Antihypertensive Drug Responses, 12
Converting Enzyme Inhibition in Kinin-Deficient Brown Norway Rats, 429
Cytosolic Free Calcium of Aorta in Hypertensive Rats: Chronic Inhibition of Angiotensin Converting Enzyme, 245
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441
Does Antihypertensive Therapy Improve the Function of the Vascular Endothelium? 541
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Enalapril Can Prevent Vascular Amplifier Development in Spontaneously Hypertensive Rats, 252
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635

Angiotensins
Angiotensin I Converting Enzyme and the Changes in Our Concepts Through the Years: Lewis K. Dahl Memorial Lecture, 363
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Enalapril Can Prevent Vascular Amplifier Development in Spontaneously Hypertensive Rats, 252
Intrarenal De Novo Production of Angiotensin I in Subjects With Renal Artery Stenosis, 555
Rat Angiotensinogen Is Secreted Only Constitutively When Transfected Into AtT-20 Cells, 147
The Experimental Observation That Led to Discovery of Angiotensin: 1939 Buenos Aires, Argentina, 194

Antihypertensive agents
Concentration–Effect Analysis of Antihypertensive Drug Responses, 12
Editorial Comment: Development of Genetic Hypertension: Is There a "Critical Phase"?, 615
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201

Reminiscences of the Veterans Administration Trial of the Treatment of Hypertension, 472
Aorta
Transendothelial Macromolecular Transport in the Aorta of Spontaneously Hypertensive Rats, 154
Arginine
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170
Angiotensin I Converting Enzyme and the Changes in Our Concepts Through the Years: Lewis K. Dahl Memorial Lecture, 363
Atherosclerosis
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
Transendothelial Macromolecular Transport in the Aorta of Spontaneously Hypertensive Rats, 154
Atrial natriuretic factor
Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Glucocorticoids and Atrial Natriuretic Factor Receptors on Vascular Smooth Muscle, 581
Hypotension in Transgenic Mice Expressing Atrial Natriuretic Factor Fusion Genes, 301
Inhibition of Endopeptidase EC 24.11 in Humans: Renal and Endocrine Effects, 269
Atrial natriuretic peptides
Chronic Atriopeptin Regulation of Arterial Pressure in Conscious Hypertensive Rats, 642
Autonomic nervous system
Antirenin Immunization Versus Angiotensin Converting Enzyme Inhibition in Rats, 80
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414
Autoregulation
Normalization of Impaired Coronary Circulation in Hypertrophied Rat Hearts, 26

B

Baroreceptors
Antirenin Immunization Versus Angiotensin Converting Enzyme Inhibition in Rats, 80
Cardiac Afferents Attenuate Renal Sympathetic Baroreceptor Reflexes During Acute Hypertension, 131
Exaggerated Response to Alerting Stimuli in Spontaneously Hypertensive Rats, 290
Benazepril
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Betaine
Importance of Organic Osmolytes for Osmoregulation By Renal Medullary Cells, 595
Blood flow
Time Course of Hemodynamic Responses to Sodium in Elderly Hypertensive Patients, 387
Blood pressure
A Kallikrein-like Enzyme in Blood Vessels of One-Kidney, One Clip Hypertensive Rats, 436
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462
Antirenin Immunization Versus Angiotensin Converting Enzyme Inhibition in Rats, 80
Brief Angiotensin Converting Enzyme Inhibitor Treatment in Young Spontaneously Hypertensive Rats Reduces Blood Pressure Long-term, 603
Chronic Atriopeptin Regulation of Arterial Pressure in Conscious Hypertensive Rats, 642
Converting Enzyme Inhibition in Kinin-Deficient Brown Norway Rats, 429
Diurnal Cardiovascular Patterns in Spontaneously Hypertensive and Wistar-Kyoto Rats, 422
Early 24-Hour Blood Pressure Elevation in Normotensive Subjects With Parental Hypertension, 491
Editorial Comment: Development of Genetic Hypertension: Is There a "Critical Phase"?, 615
Effect of Age on the Efficacy of Blood Pressure Treatment Strategies, 700
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
Exercise Tolerance and Alcohol Intake: Blood Pressure Relation, 501
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682
Hypotension in Transgenic Mice Expressing Atrial Natriuretic Factor Fusion Genes, 301
Inheritance of Hypertension and Blood Pressure Reactivity, 498
Insulin Resistance and Blood Pressure in Young Black Men, 706
Interleukin-2 Does Not Attenuate Hypertension in Spontaneously Hypertensive Rats, 468
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414
Systemic and Regional Hemodynamics in Patients With Salt-Sensitive Hypertension, 235
The Surprising Kidney-Fluid Mechanism for Pressure Control—Its Infinite Gain!, 725
Transgenic Animals in Hypertension Research: New Approaches to Old Questions, 308
Two-Way Factorial Study of Alcohol and Salt Restriction in Treated Hypertensive Men, 398
Body composition
Insulin Resistance and Blood Pressure in Young Black Men, 706
Body fat
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462
Body fluids
The Surprising Kidney-Fluid Mechanism for Pressure Control—Its Infinite Gain!, 725
Borderline hypertension
Psychosomatic Factors in Borderline Hypertensive Subjects and Offspring of Hypertensive Parents, 627
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617
Bradykinin
Angiotensin I Converting Enzyme and the Changes in Our Concepts Through the Years: Lewis K. Dahl Memorial Lecture, 363
Converting Enzyme Inhibition in Kinin-Deficient Brown Norway Rats, 429
Brain stem
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Brown Norway rat
Converting Enzyme Inhibition in Kinin-Deficient Brown Norway Rats, 429

C

Calcium
Calcitropic Hormones, Platelet Calcium, and Blood Pressure in Essential Hypertension, 515
Cytosolic Free Calcium of Aorta in Hypertensive Rats: Chronic Inhibition of Angiotensin Converting Enzyme, 245
Calcium channel blockers
Comparison of Converting Enzyme Inhibitor and Calcium Channel Blocker in Hypertensive Glomerular Injury, 452
Concentration–Effect Analysis of Antihypertensive Drug Responses, 12
Captopril
Does Antihypertensive Therapy Improve the Function of the Vascular Endothelium? 541
Cardiac function
Hypertension-Induced Cardiac Hypertrophy: Oxygen Supply and Consumption With Pacing, 35

Cardiac output
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617
Cardiovascular adaptation
Hypertension Research: A Memoir 1920–1960, 102
"Structural Factor" in Primary and Secondary Hypertension, 89
Cardiovascular disease
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
Cardiovascular system
Central Role for Vasopressin in Cardiovascular Regulation and the Pathogenesis of Hypertension, 213
Hypertension Research: A Memoir 1920–1960, 102
"Structural Factor" in Primary and Secondary Hypertension, 89
Catecholamines
Antirenin Immunization Versus Angiotensin Converting Enzyme Inhibition in Rats, 80
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Cell cultures
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635
Central nervous system
Central Role for Vasopressin in Cardiovascular Regulation and the Pathogenesis of Hypertension, 213
Cerebrovascular disease
Silent Cerebrovascular Disease in the Elderly: Correlation with Ambulatory Pressure, 692
Chemoreceptors
Role of Macula Densa in Diuretics-Induced Renin Release, 261
Chronic hypertension
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Cilazapril
Does Antihypertensive Therapy Improve the Function of the Vascular Endothelium? 541
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Clinical trials
Reminiscences of the Veterans Administration Trial of the Treatment of Hypertension, 472
Cloning, molecular
Angiotensin I Converting Enzyme and the Changes in Our Concepts Through the Years: Lewis K. Dahl Memorial Lecture, 363
Coarctation hypertension
Normalization of Impaired Coronary Circulation in Hypertrophied Rat Hearts, 26
Cold pressor test
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
Congestive heart failure
Pressor Systems in Hypertension and Congestive Heart Failure: Role of Vasopressin, 587
Constitutive secretion
Rat Angiotensinogen Is Secreted Only Constitutively When Transfected Into AtT-20 Cells, 147
Coronary circulation
Normalization of Impaired Coronary Circulation in Hypertrophied Rat Hearts, 26
Cotransport
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Crosses, genetic
Hypertension in the Spontaneously Hypertensive Rat Is Linked To the Y Chromosome, 277
Cyclic GMP
Inhibition of Endopeptidase EC 24.11 in Humans: Renal and Endocrine Effects, 269
Nitric Oxide: A Novel Signal Transduction Mechanism for Transcellular Communication, 477

D

Dahl rats
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Platelet Phosphatidylcholine Turnover in Experimental Hypertension, 190
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282
Dehydroepiandrosterone
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462
Deoxycorticosterone
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Platelet Phosphatidylcholine Turnover in Experimental Hypertension, 190
Dexamethasone
Glucocorticoids and Atrial Natriuretic Factor Receptors on Vascular Smooth Muscle, 581
Diabetes mellitus
Decreased Prevalence of Hypertension in Mexican-Americans, 225
Dipyridamole
ST Segment Depression Elicited by Dipyridamole Infusion in Asymptomatic Hypertensive Patients, 19
Diuresis
Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Role of Macula Densa in Diuretics-Induced Renin Release, 261
Diurnal rhythm
Diurnal Cardiovascular Patterns in Spontaneously Hypertensive and Wistar-Kyoto Rats, 422

E

Echocardiography
Early 24-Hour Blood Pressure Elevation in Normotensive Subjects With Parental Hypertension, 491
ST Segment Depression Elicited by Dipyridamole Infusion in Asymptomatic Hypertensive Patients, 19
Time Course of Hemodynamic Responses to Sodium in Elderly Hypertensive Patients, 387
Enalapril
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Regression of Cardiac Hypertrophy in Spontaneously Hypertensive Rats by Enalapril and the Expression of Contractile Proteins, 662
Endopeptidase
Chronic Atriopeptin Regulation of Arterial Pressure in Conscious Hypertensive Rats, 642
Endopeptidases
Inhibition of Endopeptidase EC 24.11 in Humans: Renal and Endocrine Effects, 269
Endorphins
Cardiac Afferents Attenuate Renal Sympathetic Baroreceptor Reflexes During Acute Hypertension, 131
Endothelin
Role of Endothelium in the Response to Endothelin in Hypertension, 677
Endothelium
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170

Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
H_2O_2 and Endothelium-Dependent Cerebral Arteriolar Dilation: Implications for the Identity of Endothelium-Derived Relaxing Factor Generated By Acetylcholine, 162
Nitric Oxide: A Novel Signal Transduction Mechanism for Transcellular Communication, 477
Transendothelial Macromolecular Transport in the Aorta of Spontaneously Hypertensive Rats, 154

Endothelium-derived relaxing factor
Role of Endothelium in the Response to Endothelin in Hypertension, 677

Enkephalins
Angiotensin I Converting Enzyme and the Changes in Our Concepts Through the Years: Lewis K. Dahl Memorial Lecture, 363

Epidemiology
Effect of Age on the Efficacy of Blood Pressure Treatment Strategies, 700
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617

Epinephrine
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282

Essential hypertension
Biometric Genetic Analysis of Blood Pressure in the Spontaneously Hypertensive Rat, 718
Calcitropic Hormones, Platelet Calcium, and Blood Pressure in Essential Hypertension, 515
Central Role for Vasopressin in Cardiovascular Regulation and the Pathogenesis of Hypertension, 213
Close Correlation of Intra-abdominal Fat Accumulation to Hypertension in Obese Women, 484
Decreased Prevalence of Hypertension in Mexican-Americans, 225
Editorial Comment: Clinical Significance of "White Coat" Hypertension, 624
Enalapril and Renal Injury in Spontaneously Hypertensive Rats, 544
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682
Hypertension Research: A Memoir 1920–1960, 102
Injection of 1,25-$(OH)_2$ Vitamin D_3 Enhances Resistance Artery Contractile Properties, 523
Insulin Resistance and Blood Pressure in Young Black Men, 706
Interleukin-2 Does Not Attenuate Hypertension in Spontaneously Hypertensive Rats, 468
Physiological, Psychological, and Behavioral Factors and White Coat Hypertension, 140
Platelet Phosphatidylcholine Turnover in Experimental Hypertension, 190
Pressor Systems in Hypertension and Congestive Heart Failure: Role of Vasopressin, 587
Reminiscences of the Veterans Administration Trial of the Treatment of Hypertension, 472
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414
Similar Frequencies of Renin Gene Restriction Fragment Length Polymorphisms in Hypertensive and Normotensive Subjects, 712
ST Segment Depression Elicited by Dipyridamole Infusion in Asymptomatic Hypertensive Patients, 19
"Structural Factor" in Primary and Secondary Hypertension, 89
Time Course of Hemodynamic Responses to Sodium in Elderly Hypertensive Patients, 387
Transgenic Animals in Hypertension Research: New Approaches to Old Questions, 308
Two-Way Factorial Study of Alcohol and Salt Restriction in Treated Hypertensive Men, 398
Variations in the Apparent pH Set Point for Activation of Platelet Na-H Antiport, 180

Ethnic differences
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462
Decreased Prevalence of Hypertension in Mexican-Americans, 225
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Variations in the Apparent pH Set Point for Activation of Platelet Na-H Antiport, 180

Ethnic groups
Insulin Resistance and Blood Pressure in Young Black Men, 706

Exercise test
Exercise Tolerance and Alcohol Intake: Blood Pressure Relation, 501
Physiological, Psychological, and Behavioral Factors and White Coat Hypertension, 140

F

Fish oils
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682

Fluorescent dyes
Cytosolic Free Calcium of Aorta in Hypertensive Rats: Chronic Inhibition of Angiotensin Converting Enzyme, 245

G

Ganglionic blockaders
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441

Gender
Variations in the Apparent pH Set Point for Activation of Platelet Na-H Antiport, 180

Genetic hypertension
Brief Angiotensin Converting Enzyme Inhibitor Treatment in Young Spontaneously Hypertensive Rats Reduces Blood Pressure Long-term, 603
Early 24-Hour Blood Pressure Elevation in Normotensive Subjects With Parental Hypertension, 491
Editorial Comment: Development of Genetic Hypertension: Is There a "Critical Phase"?, 615
Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Hypertension in the Spontaneously Hypertensive Rat Is Linked To the Y Chromosome, 277
Inheritance of Hypertension and Blood Pressure Reactivity, 498
Neuropeptide Y in Rat Sympathetic Neurons Is Altered by Genetic Hypertension and By Age, 63
Psychosomatic Factors in Borderline Hypertensive Subjects and Offspring of Hypertensive Parents, 627
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282
Thromboxane A_2 and Development of Genetic Hypertension in the Lyon Rat Strain, 655

Genetics
Biometric Genetic Analysis of Blood Pressure in the Spontaneously Hypertensive Rat, 718
Hypertension in the Spontaneously Hypertensive Rat Is Linked To the Y Chromosome, 277
Hypotension in Transgenic Mice Expressing Atrial Natriuretic Factor Fusion Genes, 301
"Structural Factor" in Primary and Secondary Hypertension, 89
Transgenic Animals in Hypertension Research: New Approaches to Old Questions, 308

Glomerular function
Enhanced Vascular Tone in the Renal Vasculature of Spontaneously Hypertensive Rats, 648

Glomerulosclerosis
Comparison of Converting Enzyme Inhibitor and Calcium Channel Blocker in Hypertensive Glomerular Injury, 452

Enalapril and Renal Injury in Spontaneously Hypertensive Rats, 544
Glucocorticoids
Glucocorticoids and Atrial Natriuretic Factor Receptors on Vascular Smooth Muscle, 581
Glucose
Insulin Resistance and Blood Pressure in Young Black Men, 706
Glycerophosphorylcholine
Importance of Organic Osmolytes for Osmoregulation By Renal Medullary Cells, 595
Goldblatt hypertension
A Kallikrein-like Enzyme in Blood Vessels of One-Kidney, One Clip Hypertensive Rats, 436
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441

H

Heart
Evidence for Increased Renal Norepinephrine Overflow During Sodium Restriction in Humans, 121
Heart rate
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
Exaggerated Response to Alerting Stimuli in Spontaneously Hypertensive Rats, 290
Hypertension-Induced Cardiac Hypertrophy: Oxygen Supply and Consumption With Pacing, 35
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617
Hemodynamics
Enhanced Vascular Tone in the Renal Vasculature of Spontaneously Hypertensive Rats, 648
Time Course of Hemodynamic Responses to Sodium in Elderly Hypertensive Patients, 387
Historical article
The Experimental Observation That Led to Discovery of Angiotensin: 1939 Buenos Aires, Argentina, 194
Human studies
Evidence for Increased Renal Norepinephrine Overflow During Sodium Restriction in Humans, 121
Hydralazine
Does Antihypertensive Therapy Improve the Function of the Vascular Endothelium? 541
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Hyperemia
Normalization of Impaired Coronary Circulation in Hypertrophied Rat Hearts, 26
Hyperglycemia
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
Hyperinsulinism
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
***Hypertension* journal**
Thanks to the Reviewers, Acknowledgment of Reviewers, 731
Hypertrophy
Enalapril Can Prevent Vascular Amplifier Development in Spontaneously Hypertensive Rats, 252
Hypertension-Induced Cardiac Hypertrophy: Oxygen Supply and Consumption With Pacing, 35
Normalization of Impaired Coronary Circulation in Hypertrophied Rat Hearts, 26
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
Regression of Cardiac Hypertrophy in Spontaneously Hypertensive Rats by Enalapril and the Expression of Contractile Proteins, 662
Hypokalemia
Optimizing Cardiovascular Risk Reduction During Antihypertensive Therapy, 201
Hypotension
Hypotension in Transgenic Mice Expressing Atrial Natriuretic Factor Fusion Genes, 301
Hypothalamus
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55

I

Immunohistochemistry
Neuropeptide Y in Rat Sympathetic Neurons Is Altered By Genetic Hypertension and By Age, 63
Inositol
Importance of Organic Osmolytes for Osmoregulation By Renal Medullary Cells, 595
Insulin
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617
Insulin resistance
Insulin Resistance and Blood Pressure in Young Black Men, 706
Intercellular junctions
Transendothelial Macromolecular Transport in the Aorta of Spontaneously Hypertensive Rats, 154
Interleukin-2
Interleukin-2 Does Not Attenuate Hypertension in Spontaneously Hypertensive Rats, 468
Ischemia
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
ST Segment Depression Elicited by Dipyridamole Infusion in Asymptomatic Hypertensive Patients, 19
Isoelectric focusing
Renal Secretion and Hepatic Clearance of Human Multiple Renin Forms, 669

K

Kallikrein
A Kallikrein-like Enzyme in Blood Vessels of One-Kidney, One Clip Hypertensive Rats, 436
Kidney
Enhanced Vascular Tone in the Renal Vasculature of Spontaneously Hypertensive Rats, 648
Evidence for Increased Renal Norepinephrine Overflow During Sodium Restriction in Humans, 121
Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Kidneys
The Surprising Kidney-Fluid Mechanism for Pressure Control—Its Infinite Gain!, 725
Kinins
A Kallikrein-like Enzyme in Blood Vessels of One-Kidney, One Clip Hypertensive Rats, 436
Converting Enzyme Inhibition in Kinin-Deficient Brown Norway Rats, 429

Nitric oxide
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
H_2O_2 and Endothelium-Dependent Cerebral Arteriolar Dilation: Implications for the Identity of Endothelium-Derived Relaxing Factor Generated By Acetylcholine, 162
Nitric Oxide: A Novel Signal Transduction Mechanism for Transcellular Communication, 477
Norepinephrine
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170
Enalapril Can Prevent Vascular Amplifier Development in Spontaneously Hypertensive Rats, 252
Evidence for Increased Renal Norepinephrine Overflow During Sodium Restriction in Humans, 121
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282
Upregulation of Renal α_2-Adrenergic Receptors Is Not Indicative of Salt-Related Increases in Blood Pressure in Spontaneously Hypertensive Rats, 49

O

Obesity
Close Correlation of Intra-abdominal Fat Accumulation to Hypertension in Obese Women, 484
Decreased Prevalence of Hypertension in Mexican-Americans, 225
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617
Osmotic regulation
Importance of Organic Osmolytes for Osmoregulation By Renal Medullary Cells, 595
Oxygen consumption
Hypertension-Induced Cardiac Hypertrophy: Oxygen Supply and Consumption With Pacing, 35
Oxygen radicals
Endothelium-Derived Relaxing Factors: A Perspective From In Vivo Data, 371
H_2O_2 and Endothelium-Dependent Cerebral Arteriolar Dilation: Implications for the Identity of Endothelium-Derived Relaxing Factor Generated By Acetylcholine, 162

P

Parathyroid hormones
Calcitropic Hormones, Platelet Calcium, and Blood Pressure in Essential Hypertension, 515
Pentolinium tartrate
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441
Peptides
Human Renin Inhibitor Peptides, 1
Pharmacokinetics
Concentration–Effect Analysis of Antihypertensive Drug Responses, 12
Phosphatidylcholines
Platelet Phosphatidylcholine Turnover in Experimental Hypertension, 190
Platelets
Nitric Oxide: A Novel Signal Transduction Mechanism for Transcellular Communication, 477
Platelet Phosphatidylcholine Turnover in Experimental Hypertension, 190
Potassium
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635
Pressor response
Pressor Systems in Hypertension and Congestive Heart Failure: Role of Vasopressin, 587
Primary hypertension
Enalapril Can Prevent Vascular Amplifier Development in Spontaneously Hypertensive Rats, 252
Propranolol
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682
Proteinuria
Comparison of Converting Enzyme Inhibitor and Calcium Channel Blocker in Hypertensive Glomerular Injury, 452
Enalapril and Renal Injury in Spontaneously Hypertensive Rats, 544
Psychological tests
Physiological, Psychological, and Behavioral Factors and White Coat Hypertension, 140

R

Rabbit studies
Cardiac Afferents Attenuate Renal Sympathetic Baroreceptor Reflexes During Acute Hypertension, 131
Hypertension-Induced Cardiac Hypertrophy: Oxygen Supply and Consumption With Pacing, 35
Rat studies
Biometric Genetic Analysis of Blood Pressure in the Spontaneously Hypertensive Rat, 718
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532
Renal artery obstruction
Intrarenal De Novo Production of Angiotensin I in Subjects With Renal Artery Stenosis, 555
Renal circulation
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441
Renal function
Enalapril and Renal Injury in Spontaneously Hypertensive Rats, 544

Exaggerated Natriuretic Response to Atrial Natriuretic Factor in Rats Developing Spontaneous Hypertension, 72
Renal Secretion and Hepatic Clearance of Human Multiple Renin Forms, 669

Renal hypertension
Comparison of Converting Enzyme Inhibitor and Calcium Channel Blocker in Hypertensive Glomerular Injury, 452
The Experimental Observation That Led to Discovery of Angiotensin: 1939 Buenos Aires, Argentina, 194

Renin
Determinants of Angiotensin II Generation During Converting Enzyme Inhibition, 564
Development of Hypertension From Unilateral Renal Artery Stenosis in Conscious Dogs, 441
Fish Oil Amplifies the Effect of Propranolol in Mild Essential Hypertension, 682
Human Renin Inhibitor Peptides, 1
Intrarenal De Novo Production of Angiotensin I in Subjects With Renal Artery Stenosis, 555
Renal Secretion and Hepatic Clearance of Human Multiple Renin Forms, 669
Role of Macula Densa in Diuretics-Induced Renin Release, 261
Similar Frequencies of Renin Gene Restriction Fragment Length Polymorphisms in Hypertensive and Normotensive Subjects, 712
The Experimental Observation That Led to Discovery of Angiotensin: 1939 Buenos Aires, Argentina, 194

Renin inhibitors
Human Renin Inhibitor Peptides, 1

Renin-angiotensin system
Inhibition of Endopeptidase EC 24.11 in Humans: Renal and Endocrine Effects, 269
Rat Angiotensinogen Is Secreted Only Constitutively When Transfected Into AtT-20 Cells, 147
Renal Secretion and Hepatic Clearance of Human Multiple Renin Forms, 669

Renin-angiotensin-aldosterone system
Role of the Adrenal Renin-Angiotensin System on Adrenocorticotropic Hormone– and Potassium-Stimulated Aldosterone Production by Rat Adrenal Glomerulosa Cells in Monolayer Culture, 635

Renovascular hypertension
Enhanced Vascular Tone in the Renal Vasculature of Spontaneously Hypertensive Rats, 648

Restriction fragment length polymorphisms
Similar Frequencies of Renin Gene Restriction Fragment Length Polymorphisms in Hypertensive and Normotensive Subjects, 712

Risk factors
Editorial Comment: Clinical Significance of "White Coat" Hypertension, 624
Psychosomatic Factors in Borderline Hypertensive Subjects and Offspring of Hypertensive Parents, 627
"White Coat" Versus "Sustained" Borderline Hypertension in Tecumseh, Michigan, 617

S

Secondary hypertension
Hypertension Research: A Memoir 1920–1960, 102
"Structural Factor" in Primary and Secondary Hypertension, 89

Serotonin
Effects of Angiotensin Converting Enzyme Inhibitors and of Hydralazine on Endothelial Function in Hypertensive Rats, 532

Skinfold thickness
Adrenal Androgen Excretion During Adrenarche: Relation to Race and Blood Pressure, 462

Slow-reacting substances
A Kallikrein-like Enzyme in Blood Vessels of One-Kidney, One Clip Hypertensive Rats, 436

Socioeconomic factors
Decreased Prevalence of Hypertension in Mexican-Americans, 225

Sodium
Effects of Salt, Race, and Hypertension on Reactivity to Stressors, 573
Evidence for Increased Renal Norepinephrine Overflow During Sodium Restriction in Humans, 121
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Systemic and Regional Hemodynamics in Patients With Salt-Sensitive Hypertension, 235
Time Course of Hemodynamic Responses to Sodium in Elderly Hypertensive Patients, 387
Two-Way Factorial Study of Alcohol and Salt Restriction in Treated Hypertensive Men, 398

Sodium transport
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Variations in the Apparent pH Set Point for Activation of Platelet Na-H Antiport, 180

Sodium-dependent hypertension
NaCl Does Not Affect Hypothalamic Noradrenergic Input in Deoxycorticosterone Acetate/NaCl and Dahl Salt-Sensitive Rats, 55
Red Blood Cell Na^+ Transport As a Predictor of Blood Pressure Response to Na^+ Load in Young Blacks and Whites, 508
Role of Epinephrine in the Development of Hypertension in Dahl Salt-Sensitive Rats, 282
Salt Sensitivity in Humans Is Associated With Abnormal Acid-Base Regulation, 407
Upregulation of Renal α_2-Adrenergic Receptors Is Not Indicative of Salt-Related Increases in Blood Pressure in Spontaneously Hypertensive Rats, 49

Sorbitol
Importance of Organic Osmolytes for Osmoregulation By Renal Medullary Cells, 595

Spectral analysis
Sequential Spectral Analysis of 24-Hour Blood Pressure and Pulse Interval in Humans, 414

Spontaneously hypertensive rats
Activation of Endothelial L-Arginine Pathway in Resistance Arteries: Effect of Age and Hypertension, 170
Antirenin Immunization Versus Angiotensin Converting Enzyme Inhibition in Rats, 80
Biometric Genetic Analysis of Blood Pressure in the Spontaneously Hypertensive Rat, 718
Brief Angiotensin Converting Enzyme Inhibitor Treatment in Young Spontaneously Hypertensive Rats Reduces Blood Pressure Long-term, 603
Chronic Atriopeptin Regulation of Arterial Pressure in Conscious Hypertensive Rats, 642
Cytosolic Free Calcium of Aorta in Hypertensive Rats: Chronic Inhibition of Angiotensin Converting Enzyme, 245
